

BEST AVAILABLE COPY**ABSTRACT****Gaming Apparatus**

- 5 Gaming apparatus (10) comprising a processor (28) operable to display a plurality of symbols (52A-52E) on a screen (14), each symbol having a respective win designation. Symbol control means in the form of operating buttons (16A-E) enable a user to select a symbol whereby to move the symbol from a non-viewable condition in which the respective win designation cannot be viewed, to a viewable condition in
- 10 which the win designation is revealed. Upon selection of each symbol, the respective symbol is disposed of with only the final symbol to be selected providing a win in accordance with the win designation of that symbol.
